

LSU Health

Annual Report

Letter from the Vice President

This 2010 annual report highlights the services and accomplishments of our hospitals, clinics and health sciences centers, each of which continues its own individual tradition of healthcare and medical education, under the umbrella of LSU Health. The wide reach of LSU Health enables many in Louisiana, regardless of their ability to pay, to receive quality healthcare, allowing them to live healthy, productive lives.

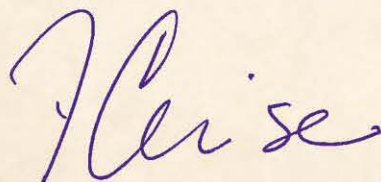

LSU Health also trains our future healthcare providers, just as it has for generations. With two health sciences centers, ten hospitals and hundreds of clinics, LSU Health touches, in one way or another, the lives of nearly everyone in the state. Many, if not most of us, have received care from doctors, nurses, dentists and allied health professionals who were trained in LSU hospitals and clinics. It is safe to say, in one fashion or another, LSU is a part of us all.

LSU Health continues its enduring tradition of caring with an eye on imminent changes and future challenges facing healthcare systems and providers in the years to come. In Baton Rouge, LSU is pursuing a new collaborative with Our Lady of the Lake Medical Center, which will allow patients to receive quality, comprehensive healthcare and medical residents to continue receiving the best training. As an LSU affiliate in New Orleans, University Medical Center will be built to accommodate twenty-first century best healthcare practices, rivaling any healthcare facility anywhere.

As a well established, statewide network of coordinated healthcare that encompasses primary care providers, specialists, emergency rooms, inpatient beds, pharmacies, electronic health records, disease management initiatives and other components of a comprehensive delivery system, LSU Health leverages limited resources to best meet the needs of a large Medicaid and uninsured population. Today, Medicaid serves over a million Louisiana citizens. In 2014, with federal healthcare reform, that number will increase dramatically. At LSU Health, we provide healthcare for a low-income population and deliver excellent complex services, such as trauma, burn, cancer and HIV care, for the entire population, continuing our tradition of service to all.

As a statewide integrated system of care, LSU Health is well equipped and prepared to participate in the proposed federal and state delivery system reforms. We at LSU are very familiar with the reform concepts proposed to improve the coordination among delivery systems, improve outcomes, and provide more efficient care for the entire population. We are training our future healthcare workforce in this environment today. This is the work of LSU Health.

Sincerely,

Frederick P. Cerise, MD, MPH

LSU Health

The Office of Health Affairs and Medical Education within the LSU System Office provides guidance and leadership to the LSU Board of Supervisors and LSU System President on issues impacting the delivery of medical education and health services at the three LSU Health System institutions.

The LSU Health System has three distinct institutions: The Health Sciences Center New Orleans, the Health Sciences Center Shreveport and the Health Care Services Division.

The Health Sciences Center New Orleans includes the School of Medicine, School of Dentistry, School of Nursing, School of Allied Health Professions, School of Graduate Studies and School of Public Health.

The Health Sciences Center Shreveport includes the School of Medicine, School of Allied Health Professions, School of Graduate Studies, LSU Hospital-Shreveport, E.A. Conway Medical Center in Monroe and the Huey P. Long Medical Center in Pineville.

The Health Care Services Division includes the Earl K. Long Medical Center in Baton Rouge, Lallie Kemp Medical Center in Independence, Walter O. Moss Medical Center in Lake Charles, LSU Bogalusa Medical Center, Interim LSU Public Hospital in New Orleans, University Medical Center in Lafayette and Leonard J. Chabert Medical Center in Houma.

The staff of the Office of Health Affairs and Medical Education interacts with the management and staff at each of the LSU Health System institutions as well as public and

private stakeholders and partners at the local, state and federal level.

Besides Dr. Frederick Cerise as Vice President and Dr. Roxane Townsend as Assistant Vice President for Health Systems, the Office includes Dr. Lee Bairnsfather, Assistant Vice President for Information Technology, Dr. Jaquetta Clemons Davis, Assistant Vice President for Finance, Doreen Braiseaux, Assistant Vice President for Public Policy, and Liz Sumrall, Director of Planning, Strategic Initiatives, and Workforce Development.

Health Sciences Centers

LSU Health Sciences Center New Orleans

Larry H. Hollier, MD, FACS, FACC, FRCS (Eng.) Chancellor

LSUHSC New Orleans consists of six professional schools and twelve centers of excellence.

The School of Medicine

MD and MD/PhD degrees

Full-time faculty of 565 and an enrollment of 763

LSUHSC New Orleans has eleven major teaching hospitals in South Louisiana.

The School of Nursing

BSN, MN and DNS degrees

Full-time faculty of 62 and an enrollment of 978

Clinical affiliations include hospitals, clinics, schools and hospices throughout South Louisiana.

The School of Dentistry

AS, BS, MS, DDS and ADE degrees

Full-time faculty of 89 and an enrollment of 388

Clinical affiliations include hospitals and clinics throughout south Louisiana.

The School of Graduate Studies

MS, PhD and MD/PhD degrees

Full-time faculty of 112 and an enrollment of 102

The School of Allied Health Professions

BS, MCD, MHS MOT, AuD and DPT degrees

Full-time faculty of 47 and an enrollment of 385

Clinical affiliations include a dozen medical centers in Greater New Orleans and Baton Rouge.

The School of Public Health

MPH, MS and PhD degrees

Full-time faculty of 43 and an enrollment of 89

Research and service programs encompass cancer information and health, aging, juvenile justice, tobacco control and medical informatics and telemedicine.

12 Centers of Excellence

The LSUHSC New Orleans Centers of Excellence are devoted to the study and treatment of alcohol and drug abuse, cardiovascular disease, healthy aging, molecular and human genetics, oral and craniofacial biology, epilepsy, eye disease, gene therapy, neuroscience, pediatrics, cancer, asthma, allergy and respiratory disease.

LSU Health Sciences Center Shreveport

Robert Barish, MD, MBA, Chancellor

LSUHSC Shreveport consists of three professional schools and three hospitals including LSU Hospital in Shreveport, E.A. Conway Medical Center in Monroe and the Huey P. Long Medical Center in Pineville.

The School of Medicine

MD degree

Full-time faculty of 423 and an enrollment of 460

Major teaching hospitals include Overtonbrooks Veterans Affairs Medical Center, E.A. Conway Medical Center and Willis-Knighton Medical Center.

The School of Graduate Studies

MS and PhD degrees

Full-time faculty of 60 and an enrollment of 74

The School of Allied Health Professions

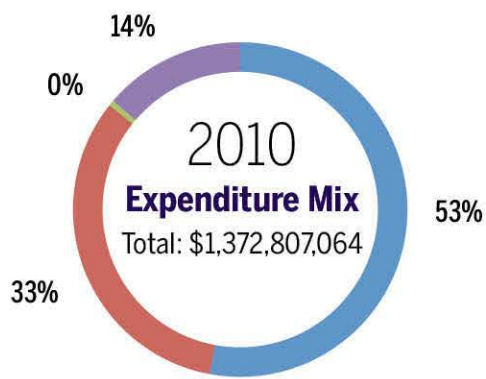

BS in Communication Disorders, Master of Occupational Therapy, Master of Physician Assistant Studies and DPT degrees

Full-time faculty of 40 and an enrollment of 293

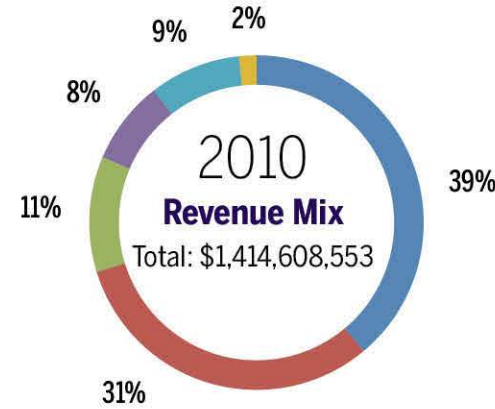

2 Centers of Excellence

The LSUHSC-Shreveport Centers of Excellence are devoted to the study and treatment of cancer, arthritis, and rheumatology.

LSU Health Sciences Center New Orleans

The LSU Health Sciences Center New Orleans is the largest Health Sciences Center in the state and along with the LSU Health Sciences Center in Shreveport trains the majority of the state's physicians. LSUHSC-NO students are Louisiana residents, and by offering a high quality, affordable education, LSUHSC-NO is helping to keep Louisiana's best and brightest right here at home.

One of the first in the nation to incorporate patient simulation into the curriculum, LSUHSC-NO has driven the technology to unprecedented capability by developing patented software that overlays existing programs, providing much more realistic and robust training scenarios. As the only Louisiana designated Level I Comprehensive Education Institute and one of the few in the country, LSUHSC-NO uses simulation technology to train teams of medical professionals, improving patient safety and outcomes.

LSUHSC-NO has developed innovative educational programs to respond to work force needs. Addressing the nursing shortage, the Career Alternative RN Education (CARE) Program fast tracks those with degrees in other disciplines to become RNs. The School of Dentistry is increasing the number of dental hygienists through tele-lectures. The School of Medicine developed one of the country's most successful Rural Track programs to increase the number of primary care physicians practicing in rural areas.

In addition to staffing the LSU hospitals in New Orleans, Baton Rouge, Lafayette, Bogalusa, Houma, Lake Charles, and Independence,

LSUHSC-NO faculty take care of patients in every major hospital in the metropolitan New Orleans area, and faculty, residents, and fellows treat hundreds of thousands of patients each year in affiliated teaching hospitals and clinics throughout the state.

The LSU Health Sciences Center New Orleans is a recognized leader in a number of research disciplines in a worldwide arena.

An enormously powerful economic engine, LSUHSC-NO generates thousands of primary and secondary jobs, and its annual economic impact pre-Katrina was in excess of a billion dollars.

LSU Health Sciences Center Shreveport

The LSU Health Sciences Center Shreveport is Northwest Louisiana's comprehensive academic health center. With teaching, research and patient care resources, LSUHSC Shreveport includes Schools of Medicine, Allied Health Professions and Graduate Studies. With a broad portfolio of biomedical research programs, the Health Sciences Center is committed to

advancing knowledge, training future healthcare providers, and public service. LSUHSC Shreveport collaborates with other leading organizations across the public and private sectors.

In addition to these academic programs, LSUHSC Shreveport has three acute care hospitals in Shreveport, Monroe and Pineville. Anchoring our network of hospitals and clinics is Louisiana's major university referral center—commonly referred to as the LSU Medical Center or University Hospital in Shreveport. Our other hospitals include the E.A. Conway Medical Center in Monroe and the

Huey P. Long Medical Center in Pineville.

LSUHSC Shreveport benefits millions of people across Louisiana each year. In fact, more than 70 percent of physicians practicing in North Louisiana are graduates of the LSU School of Medicine in Shreveport and/or completed a residency training program in an LSUHSC Shreveport hospital.

The LSU Health Sciences Center Shreveport is one of only about 120 institutions in the United States qualified for the designation of academic health sciences center.

Bogalusa Medical Center

Reliability, expertise and quality are hallmarks of the LSU Bogalusa Medical Center (BMC), which has continuously served the Northshore for over 100 years. The only full-service hospital in a 30-mile radius, BMC is a vital resource for the region.

Fully accredited by The Joint Commission, this 98-bed acute care hospital also operates 26 primary and specialty outpatient clinics and an inpatient acute psychiatric unit, which provides services to patients from throughout Louisiana. Warm and community-centered, BMC

offers a full continuum of healthcare with experienced, board-certified clinicians, including many nationally acclaimed specialists, giving patients expertise typically found only in major metropolitan hospitals.

In partnership with the LSU School of Medicine, BMC sponsors the Rural Family Medicine Residency Program. In 2010, it received a \$3.1 million grant to expand the number of resident training positions. BMC also partners with LSU programs in cardiology, ophthalmology, pediatrics and pathology.

To keep kids healthy, BMC provides healthcare in two school-based clinics in the Bogalusa School System. All of BMC's primary care, pediatric, family practice and school-based health clinics have recognition status as National Committee for Quality Assurance medical homes, indicating

they provide quality, comprehensive, primary healthcare, ongoing preventive and early intervention healthcare and coordinated access to specialty care when needed.

The BMC commitment to excellence is obvious—for four consecutive years eQHealth Solutions, Louisiana's Medicare quality improvement organization, has recognized BMC for superior inpatient healthcare. Most recently, BMC received the organization's Platinum Level Quality Award, the highest level attainable.

Others recognize BMC's quality as well. The American Lung Association in Louisiana named the BMC Asthma Program an Asthma Center of Excellence, one of only two programs in the state to achieve this designation.

BMC participates in the LSU Disease Management Program, which manages chronic diseases according to nationally accepted, evidence-based guidelines. This year BMC received the LSU Diabetes Clinical Lead Award and Clinical Excellence Awards in Heart Failure Care, Asthma Care, Cancer Screening, Tobacco Cessation and Emergency Department Care. Without question, BMC is an irreplaceable Northshore asset.

Leonard J. Chabert Medical Center

Leonard J Chabert Medical Center (LJCMC) opened its doors in 1978 as a teaching hospital, providing quality healthcare services for all who seek care, regardless of the ability to pay. Fully accredited by The Joint Commission, LJCMC is a full-service institution for inpatient services with extensive outpatient services.

Physicians and physician extenders are contracted through South Louisiana Medical Associates (SLMA) and LSU for patient care service and medical training. In addition to medical training, LJCMC serves as a clinical training site for nursing and allied health programs in the region.

LJCMC initiated a hospital-based accredited Internal Medicine residency program in 2008 in an effort to replenish the area with primary care physicians. Currently, 18 internal medicine residents are in training. This number will increase to 24 residents on July 1, 2011. Moreover, collaborative partnerships for residency training programs include LSU and Ochsner. Clinical trials and ongoing research studies provide a valuable resource to enhance staff education and potentially improve patient care options.

LJCMC participates in the evidence-based LSU Disease Management Program, which manages chronic diseases with a wellness model based on preventive care and patient education. In 2009, the LSU System Quality Award was awarded to LJCMC for success in significantly reducing the surgical site infection rate

through a structured performance improvement project. The hospital consistently receives Louisiana Hospital Awards from the Louisiana Health Care Review. In October 2010, LJCMC was invited to be a permanent site host for the American Cancer Society, serving as a resource center for oncology patients.

LJCMC is nationally recognized as a Patient Centered Medical Home. The primary care clinics are accredited through the National Committee for Quality Assurance. A valued feature of the outpatient service is emphasis on patients knowing who their primary provider is with a solid relationship to improve wellness initiatives and healthcare outcomes.

The hospital continually strives to meet the ever changing healthcare needs of its diverse patient population and to be a community-based medical center that is value driven and in the forefront of healthcare delivery, education, and practice.

E.A. Conway Medical Center

The E. A. Conway Medical Center is a 158-bed teaching hospital in Monroe, Louisiana. It is an integral part of the LSU Health Sciences Center at Shreveport (LSUHSC-Shreveport). With a primary service area of 12 Northeast Louisiana parishes, the medical center admitted 7,068 patients in fiscal year 2010. Conway also operates an extensive system of hospital-based outpatient clinics that recorded 147,461 outpatient visits. In addition to hosting medical students and residents, Conway is affiliated with multiple institutions of higher education across the region as

a clinical training site for pharmacy, nursing and allied health program students.

The original hospital was renamed in 1941 to honor the late E. A. Conway, a Monroe native who served as Louisiana Secretary of State. Conway's modern replacement facility opened in 1987. E. A. Conway is the sponsoring institution for a three-year, Family Medicine Residency Program. Established in January 1982, this program has had 143 physician graduates. Approximately 50 percent of the graduates have entered practice in Louisiana, and many have remained in northeast Louisiana significantly impacting healthcare delivery in this part of the state. Also, hundreds of resident physicians who are based at University Hospital in Shreveport rotate at Conway as part of their

training programs. E. A. Conway Medical Center is part of the LSUHSC-Shreveport, which also includes Schools of Medicine, Graduate Studies and Allied Health Professions as well as University Hospital in Shreveport and Huey P. Long Medical Center in Pineville.

Lallie Kemp Regional Medical Center

Lallie Kemp Regional Medical Center recently celebrated 70 years of serving quality healthcare to the Northshore. LKRMC is a critical access hospital with the maximum capacity of 25 acute care/swing beds and meets the federal regulations for this designation: It is in a rural area, provides 24-hour emergency care services and maintains an average length of stay of 96 hours or less. Available to anyone regardless of the ability to pay, LKRMC is a major provider of healthcare in the area.

Fully accredited by the Joint Commission, LKRMC is also a clinical training site for physicians, allied health professionals and students for technical and nursing schools, providing much needed healthcare professionals to the Northshore.

LKRMC received the Silver Level 2009 Louisiana Hospital Quality Award from the Louisiana Health Care Review, one of the highest levels this Medicare quality improvement organization recognizes. LKRMC received the award for improving the healthcare it provides to its patients.

LKRMC participates in the LSU Disease Management Program, which manages chronic diseases according to nationally accepted, evidence-based guidelines.

Besides fulfilling its role as a critical access hospital with superior healthcare, LKRMC has excellent outpatient services. The LKRMC Outpatient Clinic has recognition status as a Physician Practice Connections—Patient Centered Medical Home by the National Committee for Quality Assurance (NCQA). The Clinic has met rigorous NCQA requirements to receive this recognition, meeting the highest benchmark possible.

This point of care provides ongoing preventive and early intervention healthcare to patients and coordinates specialized care when patients require it, consistently offering superior medical services. Few clinics in the nation have achieved this designation. This recognition status places LKRMC among the elite in healthcare, marking it as a place of excellence and enduring commitment to its community.

Earl K. Long Medical Center

Earl K. Long Medical Center (EKLMC) is a licensed, 175-bed, acute care hospital providing healthcare for patients from East Baton Rouge Parish and the seven surrounding parishes of Ascension, West Baton Rouge, East and West Feliciana, Iberville, Livingston and Point Coupee.

EKLMC provides quality care regardless of a patient's ability to pay and serves as a teaching hospital for graduate medical education, nursing and allied healthcare professionals.

EKLMC received the Silver Level 2009 Louisiana Hospital Quality Award from

eQHealth Solutions for improving the quality of healthcare given to EKLMC patients. EKLMC actively engages in improving care in the areas of acute myocardial infarction (heart attack), heart failure, pneumonia and surgical care.

EKLMC exceeded the national and regional averages on an annual basis in the HCAHPS (Hospital Consumer Assessment of Healthcare Providers and Systems) survey on inpatient perspectives on the general quality of hospital services. EKLMC excelled in pain management communication with nurses and doctors, communication about medication, responsiveness of hospital staff, a quiet and clean hospital environment, discharge information, overall patient satisfaction, patients' willingness to recommend the hospital and overall patient rating of the hospital.

EKLMC has outpatient services for women's health, family practice, internal medicine, surgery, orthopedics, oral surgery, HIV, pediatrics, dermatology, rheumatology and other subspecialties, and inpatient services for obstetrics, internal and emergency medicine and surgery.

EKLMC also provides primary medical care at the North Baton Rouge Clinic, LSU/EKLMC South Baton Rouge Clinic, the Leo S. Butler Community Center and the Mid-City Clinic.

EKLMC is in partnership with the East Baton Rouge Parish School Board, providing healthcare in six school-based clinics for schools throughout the region.

EKLMC participates in the LSU Disease Management Program, which manages chronic diseases according to nationally accepted, evidence-based guidelines. The American Lung Association in Louisiana named the EKLMC Asthma Program an Asthma Center of Excellence. The EKLMC Asthma Program was the first program in the entire State of Louisiana with this designation.

EKLMC is accredited by the Joint Commission, the nation's leading independent healthcare ratings organization.

Huey P. Long Medical Center

Huey P. Long Medical Center is a 60-bed acute care hospital in Pineville. Founded in 1939, the medical center's primary service area is a nine-parish region of Central Louisiana. In addition to the inpatient facility in Pineville, the hospital operates

extensive outpatient clinics at its England Airpark site in Alexandria.

As a teaching hospital, the Medical Center serves as a site for clinical rotations for physician residents and medical students from Tulane as well as students in other healthcare programs from institutions from across Louisiana. Among these programs is an accredited pharmacy practice residency developed in conjunction with the School of Pharmacy at the University of Louisiana in Monroe.

The Huey P. Long Medical Center is part of the LSU Health Sciences Center Shreveport, which also includes Schools of Medicine, Graduate Studies and Allied Health Professions as well as University Hospital in Shreveport and E.A. Conway Medical Center in Monroe.

Interim LSU Public Hospital

The Charity Hospital System has a long history in New Orleans, one that we are proud to be a part of and one that we have pledged to continue. Our legacy began with founding father French Seaman Jean Louis, who in 1732 bequeathed his entire estate to "establish and maintain a hospital for the poor people of New Orleans." L'Hospital des Pauvres de la Charité (Hospital for the Poor) began the second oldest continuously operating public hospital in the United States. Six buildings followed the first as fires and hurricanes challenged the

mission, but the spirit that erected the first brick-and-mortar structure lives on today to build a new hospital for future generations.

As healthcare advancements occur exponentially, so do their associated financial costs. No longer could a single benefactor pay for the construction and maintenance of a state-of-the-art hospital for the care of the poor. Government support is needed, and we are fortunate to have this support. From the President of the United States, to the Governor of Louisiana, to the Mayor of New Orleans, we have been assured that our plan for the replacement hospital for Charity will be built.

Times have also changed in that it is no longer desired to build a "hospital for the poor" as one separate and apart from another to care for those

with means. The new University Medical Center (UMC) will have 424 beds where patients with and without financial resources will be treated. As a center of excellence, UMC will be a point of destination, a hospital that patients will choose for their medical treatment.

Groundbreaking for the new UMC took place in April 2011, a date that will be historic for the City of New Orleans. The UMC Ambulatory Clinic Building is slated to open in November 2013, with the new hospital opening February 2015.

These are exciting times for our hospital, New Orleans and for all Louisiana citizens.

LSU University Hospital – Shreveport

LSU's University Hospital in Shreveport is a major medical center and the site of many innovations in medical care. This 459 bed facility is part of the LSU Health Sciences Center at Shreveport. It provides primary care to residents across the Shreveport – Bossier City metropolitan area and specialty care to persons across Louisiana, East Texas and South Arkansas. With experts across medical and surgical fields, advanced facilities and resources, the hospital is a leader in offering specialized care and services. It is a regional referral center for

trauma and burn care, neurosurgery, cancer services, children's health and other critical services. Well known components include the Feist-Weiller Cancer Center, the Sleep Disorders Center and Children's Hospital of LSUHSC-S.

Faculty expertise makes possible participation by patients in clinical trials, which allow them to receive cutting edge treatments and technologies. Additionally, tertiary care and quaternary care, the most sophisticated level of care, are available as the hospital serves as a regional resource for patients with complicated illnesses.

Originally established in 1876 as the Charity Hospital in downtown Shreveport, the hospital has undergone a series of expansions, relocations and name changes over the years. In 1953, it was moved to

its present location on the corner of Linwood Avenue and Kings Highway. It was in 1976 that the Louisiana Legislature affiliated it with the LSU System. The affiliation with the LSU School of Medicine in Shreveport has been successful, and great strides in patient care, education, research and public service have resulted. The hospital remains dedicated to caring for the needs of the underprivileged from across the state.

Committed to training future generations of healthcare providers, University Hospital is a training site for many medical, nursing and allied health programs. Home to graduate medical education programs for physicians across many specialties, it also serves as a clinical education site for students in the adjacent schools of Medicine, Allied Health Professions and Graduate Studies. Leading edge clinical research occurs in many specialties at the Shreveport campus as well.

Nursing and Allied Health Programs

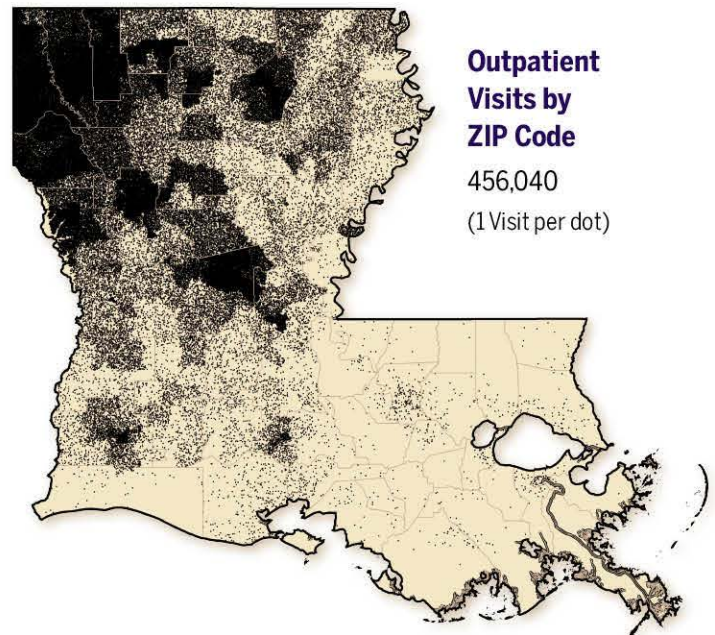

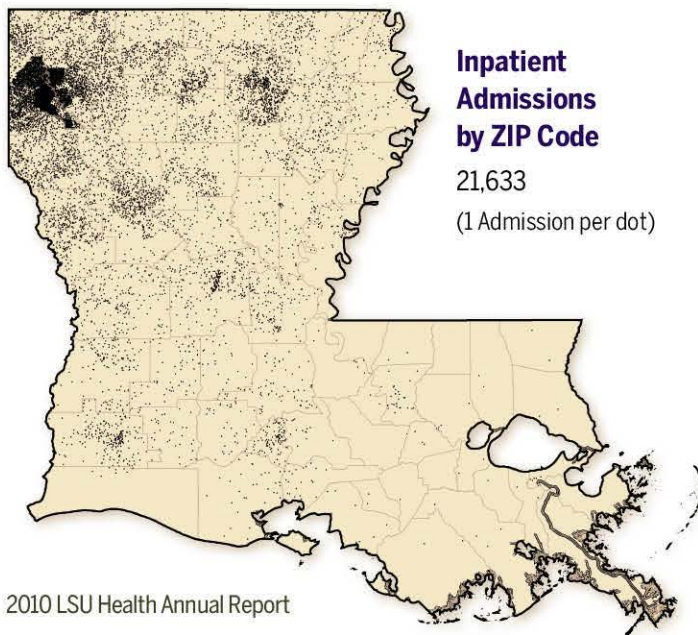

Approximately 800 students in the following programs:

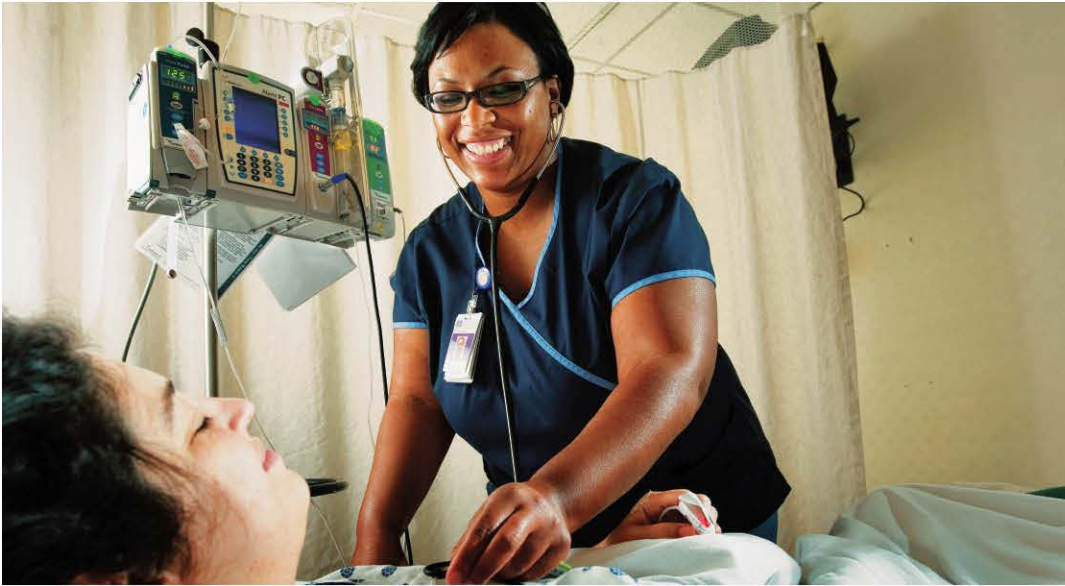

Texas Wesleyan University – CRNA student rotations
 Caddo Fire District 3, 4, and 5 – EMT/Paramedic training
 Shreveport Job Corps – Nursing Assistant training
 Bossier Parish Community College – ECG/Telemetry student training
 EMT training
 Nursing student rotation
 OTA student rotation
 Pharmacy Tech student rotation
 Phlebotomy student rotation
 Respiratory Therapy student rotation
 Bossier City Fire Department – EMT training

Residency Programs

Approximately 500 residents and fellows in the following programs:

Anesthesiology
 Emergency Medicine
 Family Medicine
 Medicine
 Neurology
 Neurosurgery
 OB/GYN
 Ophthalmology
 Oral and Maxillofacial Surgery
 Otolaryngology

Dr. Walter O. Moss Regional Medical Center

W.O. Moss Regional Medical Center (WOM) is proud to have served the population of Southwest Louisiana with quality healthcare for over 50 years.

WOM's award-winning Congestive Heart Failure (CHF) Clinic has received the Gold Plus Award for the past three years for "Get With the Guidelines Heart Failure," which is a program for in-hospital initiation of therapies recommended by the American Heart Association/ American College of Cardiology for patients hospitalized for heart failure.

The CHF Clinic is recognized as a leader in disease management and

has been featured twice in US News and World Report. The CHF clinic was selected by the Joint Commission as one of only two hospitals in Louisiana to host a learning visit for development of "New Advanced Certification in Heart Failure Care."

Each of the five WOM primary care clinics has recognition status as a Physician Practice Connections- Patient Centered Medical Home by the National Committee for Quality Assurance.

Since 1996 WOM has provided HIV- AIDS / infectious disease services under the supervision of the only infectious disease specialist in Southwest Louisiana. WOM is also the largest provider of medical care for patients living with chronic hepatitis in a five-parish area. Since September 2000, the Infectious Diseases Clinic has received, through the Health Resources and Services

Administration, federal funds (Ryan White Care Act, Part C Early Intervention) and has continually competed for and been awarded funding annually thereafter. In 2009, the clinic competed for, and was awarded, a second HRSA grant (Part D program for women and children). Current annual funding is \$640,132 for part C and \$394,246 for Part D.

With this record of success, it's clear to see why WOM's HIV Clinic received the 2010 LSU System Quality Award.

Dr. Tariq A. Khan, one of WOM's primary care physicians, possesses the elite certification of Physician Specialist in Clinical Hypertension. Recognized for his expert knowledge and skills in the management of clinical hypertension and related disorders, Dr. Khan is a local and regional consultant for the more complex and difficult hypertension cases, recommending care guidelines and process improvement.

The WOM healthcare team has worked to create a successful affiliation with the parish and community to improve the quality of prison healthcare. Use of the 340 B federal pricing program is instrumental in providing cost efficient regulation of the prison patient's medical condition, disease management and continuum of care.

University Medical Center

From pediatrics to geriatrics, University Medical Center (UMC) is a major site of quality healthcare and graduate medical education. An acute care hospital for all in Acadiana, UMC is the major site for the LSU Rural Scholars Track Program, which is offered through the LSU School of Medicine – New Orleans. Addressing the physician shortage in the state, this program encourages students to practice primary care medicine in rural areas of Louisiana.

UMC Diagnostic Cardiology continues to further the frontier of cardiovascular imaging. UMC is the only LSU hospital performing Cardiac

Magnetic Resonance Imaging with a 3 Tesla magnet.

A vascular surgeon has joined UMC and, with a certified ultrasound nurse, is enabling UMC to establish a nationally recognized and certified Vascular Lab.

UMC also opened a full service Sleep Center.

UMC's outpatient pharmacy continues to grow, supporting the Disease Management Clinic, indigent patients, HIV services and hospital clinics.

The UMC Ophthalmology Program's off-site outpatient clinic increases access for patients while it strengthens the ophthalmology residency program, providing essential medical services to 600 patients a month. UMC is the only hospital in Acadiana performing corneal transplants.

UMC also offers a variety of primary care and surgical services.

The Pediatric and Geriatric Clinics have achieved status as a medical home, providing the best available primary care and coordinating access to specialty care.

UMC's redesigned emergency services include the Mental Health Emergency Room Extension (MHERE), improving the care of patients with acute behavioral health emergencies.

UMC participates in the LSU Disease Management Program, managing chronic diseases according to nationally accepted, evidence-based guidelines.

UMC received the 2010 Outstanding Patient Experience Award from HealthGrades, the nation's leading independent healthcare ratings organization, for ranking in the top 15 percent nationally for exemplary service to patients. UMC received other notable recognitions, including Hospital of the Year for Respiratory Care and the Gold award from Louisiana Health Care Review.

FACT: LSU Health manages the largest healthcare training program in Louisiana, with two schools of medicine, two schools of graduate studies, two schools of allied health professions, a school of nursing, a school of public health and the only school of dentistry in the state.

FACT: Most of the physicians practicing in Louisiana today were trained in LSU hospitals and clinics. Since 1997, 69 percent of doctors in Louisiana received their medical school or residency training from LSU.

FACT: According to the American Association of Medical Colleges (AAMC), Louisiana ranks the fourth highest in the nation in the number of practicing physicians who received their training from a public medical school.

FACT: In 2010, 565 students were enrolled in the School of Medicine at the LSU Health Sciences Center in New Orleans, and 460 were enrolled in the School of Medicine at the LSU Health Sciences Center in Shreveport.

FACT: In 2010, in Louisiana, 1,187 of the 1,792 residents in primary care specialties (family medicine, OB/GYN, internal medicine, medicine/pediatrics, general surgery and pediatrics) were training in LSU programs.

FACT: From 2003 to 2009, about 55 percent of primary care doctors in Louisiana graduated from LSU.

FACT: LSU has Louisiana's only dental school. It has produced 75 percent of the dentists practicing in the state.

FACT: With most parishes designated as both Primary Care and Dental Health Professional Shortage Areas, LSU is tackling the problem. For example, the LSU Rural Scholars Track program recruits students from rural areas and provides tuition exemptions to those who commit to practicing primary care in rural areas. The program has 45 students enrolled and has produced 27 graduates to date, with 15 practicing family medicine.

FACT: The Rural Family Medicine Residency Program at Bogalusa Medical Center recently received an HRSA grant of \$3.1 million to double the number of residents to eight per year for its three-year program.

FACT: LSU is increasing the size of its nurse practitioner and dental programs and instituting a Nurse Practitioner Clinic and Physician Assistant Program.

FACT: LSU has 14 Centers of Excellence in the health sciences.

2010 LSU Health Facts

FACT: LSU manages the largest healthcare system in the state, and one of the largest in the nation, with ten hospitals and hundreds of clinics, in a highly coordinated network of primary and specialty care services.

FACT: The dual mission of medical education and healthcare delivery in LSU hospitals offers both quality healthcare access and quality healthcare training with the same dollars.

FACT: LSU faculty physicians provide both patient care and supervision of resident physicians providing that care. Medical training and healthcare delivery are complementary and critical components of the educational process.

FACT: LSU has the only two Level 1 Trauma Centers in Louisiana, one in New Orleans and one in Shreveport.

FACT: The nationally recognized LSU Disease Management Program targets primary care, asthma, diabetes, cancer screening, congestive heart failure, HIV, tobacco cessation, chronic kidney disease, weight management and hypertension.

FACT: The program has shown a cost avoidance of tens of millions of dollars in these high-cost, high-morbidity, high-mortality diseases.

FACT: LSU patients in the Disease Management Program meet or exceed national benchmarks on quality outcomes. For example, its Diabetes Program cares for over 20,000 people and performs above the 90th percentile nationally on quality measures.

FACT: This sophisticated, evidence-based Disease Management Program has achieved demonstrable improvements in healthcare outcomes—its success matches and, in most instances, surpasses other Louisiana hospitals.

FACT: LSU medical homes have NCQA recognition status, indicating they provide high-quality primary care and coordinate access to specialty care, according to nationally recognized guidelines.

FACT: The LSU HIV Outpatient Program is one of the best in the nation. With an emphasis on research, education, advocacy and specialty training, the program provides a one-stop shop option for HIV care.

FACT: LSU sees most of its patients in its clinics, not in its hospitals. In 2010, it had 1,591,342 outpatient encounters and clinic visits and 404,981 emergency department encounters.

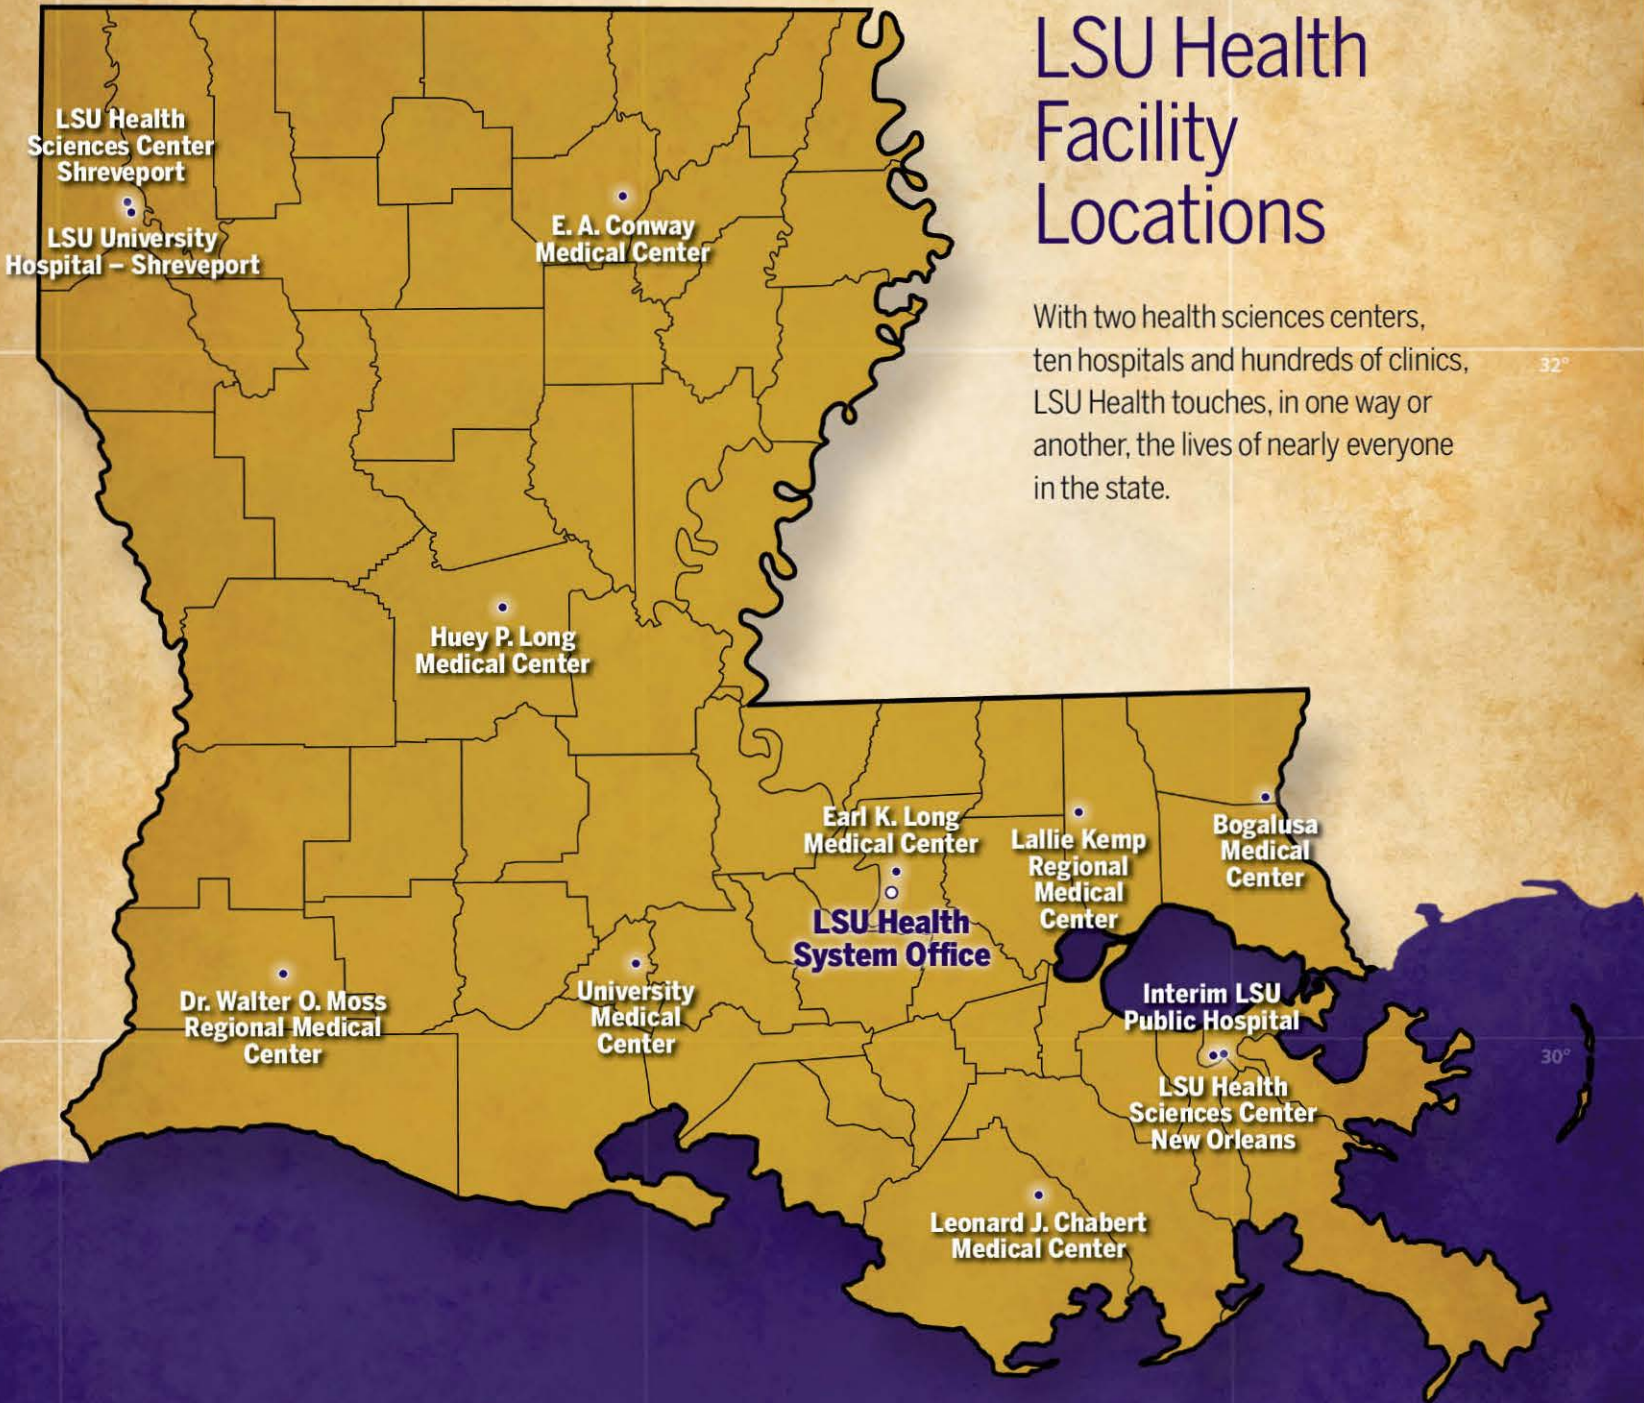

FACT: LSU hospitals had only 70,670 inpatient admissions, which includes adult/pediatric, psychiatric, neonatal ICU and nursery.

FACT: The extensive LSU network of primary care and specialty care clinics provides a continuum of care that significantly reduces the burden on emergency departments.

FACT: LSU hospitals and clinics offer a safety-net system. Everyone in Louisiana is eligible for care at any LSU hospital, regardless of the ability to pay. LSU has no income thresholds, no local residency requirements, and no pre-enrollment process. Those who can pay for care do so.

LSU Health Facility Locations

With two health sciences centers, ten hospitals and hundreds of clinics, LSU Health touches, in one way or another, the lives of nearly everyone in the state.
