

## **Applications Consultant – Electronic Health Record Lead Analyst**

The LSU Health Care Services Division (HCSD) is accepting resumes for the position of Applications Consultant located in Baton Rouge LA, in the Electronic Health Record (EHR) Program. Duties: Overview of general duties which may become more specific given the area of responsibility and specific assignments – Evaluate and understand clinical processes and workflows; translate clinical workflow requirements into applications and technical specifications; work with team members to identify technical needs, technical constraints, and potential to meet user needs; provide technical expertise in identifying, evaluating, and developing systems/procedures and system capabilities including problem solving in current state functionality; and assisting users with revising current processes and workflow. Some travel will likely be required. Qualifications: Baccalaureate degree plus six (6) years experience developing EHR or other clinical software applications to include at least 3 years as lead analyst or manager level. Information technology, systems implementation, or applicable healthcare experience may be substituted for direct EHR experience. Salary Range: **\$70,000 - \$110,000**. Send resumes to Human Resources Administration, LSU HCSD, P.O. Box 91308, Baton Rouge, LA 70821-1308; or fax to 225-354-4851. An Equal Opportunity Employer.
