

## CREATE PAR REPLEN REQUESTS PAGE:

Use the Create Par Replen Requests page to run the INPGCDMD process, which generates Material Stock Requests.

From the Current Window's Menu:

Click on **Inventory -> Replenish Par Locations -> Create Par Replen Requests**

Input **Run Control ID: (CART\_REPL)**

Verify the following:

**Process Frequency: (Always Process)** is selected

**\*Request ID: (CART\_REPL)** – this field is required. (if create a multi-line process for all Par Locations in Unit – Put Par Location ID in this field)

**Description: (PAR REPLENISHMENT)** – field is optional yet highly recommended (if create a multi-line process for all Par Locations in Unit – Put Par Location ID in this field)

**\*Unit: (your IBU)**

**Par Location Option: Specific Par Location for Unit** – use magnifying glass to find the Par Location ID

Par Location Option

All Par Locations for Unit

Specific Par Location for Unit  🔍

All for Par Location Group

**NOTE: if creating a Par Replen Requests process for multiple Par Locations use the + sign to add lines to the process and select a different cart on each line following the above steps.**

Click on  button

Process Scheduler Request displays

From the Process List select **IN Cart Replenishment** verify  (check box) on the left

Click

Click **Process Monitor** link

Click  Button – until **INPGCDMD** (Process Name) Run Status reads **Success**

Click on **Go back to Par Location Replenishment** link
