

Correct Staged Errors

Before you go to the Correct Staged Errors panel you must first setup the item in the unit. You do this by Adding Items to Business Unit, creating a Default Putaway Location, and creating a Fixed Picking Location with UOM.

Click the Inventory Link

[Inventory](#)

Click the Putaway Stock Link

[Putaway Stock](#)

Click the Correct Staged Errors Link

[Correct Staged Errors](#)

Enter Business Unit. Enter “ _____ ”

Click the Search button.

[Search](#)

If Staged Error panel does not immediately open (it does this when you have more than 1 Staging ID in error) Select the Staging ID by clicking blue Staging ID Number link

[Putaway Staging ID](#)

[27239](#)

[27240](#)

After Correct Staged Errors panel has opened – Enter the Storage Location and UOM to match the Fixed Picking Location information that you created for the item. Then Save the panel.
