

Setting Utilization Types on an Item

Follow the Navigation: Items-Define Items and Attributes-Define Business Unit Items

Put in the Unit and Item ID – Click Search

Click the Inventory Tab

Click the Utilization Types Link

Shipping/Handling [Replenishment](#) [Weight/Volume](#) [Utilization Types](#)

A screenshot of a software application window titled 'Utilization Types'. The window has a menu bar with 'General', 'Inventory', 'Substitutes', 'Manufacturing', 'Planning', 'Configuration', and 'Custom'. Below the menu bar, there are several tabs: 'Shipping/Handling', 'Replenishment', 'Weight/Volume', and 'Utilization Types'. The 'Utilization Types' tab is active. The main area of the window displays the following information:
Unit: UHCMS Item ID: 117162 Standard Unit of Measure: EA
BANDAQE ELASTIC 4 1/2 * #8715
Utilization Types: End | View All | First | 1 of 1 | Last
Utilization Group: CYCL CYCLE COUNT
Utilization Type:
Last Cycle Count: 08/13/2005 Cyc Interval (days): Next Cycle Count:
Last Physical Count: 08/21/2008 For Planning
Family: BANDAQE For Cycle Count
At the bottom of the window, there are buttons for 'Save', 'Return to Search', 'Notify', 'Add', and 'Update/Display'. A breadcrumb trail at the bottom reads: 'General | Inventory | Substitutes | Manufacturing | Planning | Configuration | Custom'.
