Designated Record Set

I. Purpose: To define documents patients have a right to access or amend within their medical and billing files and in accordance with the Health Insurance Portability Accountability Act (HIPAA) and other Federal, State, regulatory agency laws.

II. Definitions:

A. Designated Record Set (DRS) – a group of records maintained by or for a covered entity that is:

1. The medical and billing record(s) about a patient,
2. The enrollment, payment, claims adjudication and case or medical management record systems maintained by or for a health plan, or
3. Used, in whole or part, by or for the covered entity to make decisions about patients.

For purposes of this definition, the term “record” means any item, collection or grouping of information that includes Protected Health Information (PHI) and is maintained, collected, used or disseminated by or for the facility; the term “record” includes (a) patient information originated by another healthcare provider and used by the facility to make decisions about the patient, and (b) tracings, photographs, videotapes, digital and other images that may be recorded to document care of the patient.

B. Protected Health Information (PHI) – Individually identifiable health information held or transmitted by a covered entity or its business associate, in any form or media, whether electronic, paper, or oral. Includes demographic data that relates to:

- the individual's past, present, future or physical, mental health condition;
- the provisions of health care to the individual, or;
- the past, present, future payment for the provision of health care to the

individual, and that identifies the individual or for which there is a reasonable basis to believe it can be used to identify the individual. PHI includes many common identifiers such as name, address, birth date, social security number, etc.

C. Psychotherapy Notes – notes recorded by a health care provider who is a mental health professional documenting or analyzing the contents of conversation during a private counseling session or group, joint or family counseling session and that are separated from the rest of the individual's record. Psychotherapy notes do not include: medication prescription and monitoring, counseling session start and stop times, the modalities and frequencies of treatment furnished, results of clinical tests, and any summary of the following items: diagnosis, functional status, the treatment plan, symptoms, prognosis, and progress to date.

III. Policy:

LSU-HCSD includes, but is not necessarily limited to, the following as being a Designated Record Set whether in paper or electronic format:

 - b. Videos/photographs of patients
 - c. Utilization review worksheets
4. Business Associate Records – Records maintained by a Business Associate that fall within the definition of Designated Record Set, that are **not** merely duplicates of information maintained by the facility, and which are required to determine compliance with HIPAA regulations and LSU HCSD policy.

IV. The LSU-HCSD Designated Record Set does not include health information generated, collected, or maintained for purposes that do not include decision making about the patient or which is exempt from disclosure to the patient:

1. Research records while the individual is part of a clinical trial, while the clinical trial is in progress.
2. Data collected and maintained for peer review purposes
3. Data collected and maintained for performance improvement purposes
4. Data collected and maintained for compliance purposes
5. Data collected and maintained for quality control purposes
6. Risk Management records

14. Information compiled in reasonable anticipation of or for use in a civil, criminal, or administrative action or proceeding.
15. All employee health records
16. Copies of reports/documentation/forms wherein the originals are maintained in an “official” record maintained by the organization.
17. Source Data – Interpreted or summarized in the individual’s medical record (for example):
 - a. Pathology slides
 - b. Diagnostic films
 - c. Electrocardiogram tracings from which interpretations are derived
 - d. Photographs
 - e. Fetal Monitor strips

V. The Designated Record Set materials will be maintained by each LSU HCSD facility as required by Louisiana State law and/or federal rules and regulations.

VI. Each facility must identify who is responsible, within the facility, for receiving and processing requests for access by individuals and processes for tracking requests for access and/or amendment (refer to HCSD Policy 7508).
